Overview:

The Student Course Management System is a web-based platform facilitating course management for students and teachers. This system enables students to enroll in courses, track progress, submit assignments, and monitor attendance. Teachers can also manage classes and evaluate student submissions. The admin can manage courses, teachers, and students. The platform aims to streamline academic interactions, enhance learning experiences, and ensure efficient tracking of student progress.

Key Features:

- **Student & Teacher Dashboards:**
Personalized dashboards for students and teachers to manage their activities.
- **Enrollment & Progress Tracking:**
Students can enroll in courses and track their completion status.
- **Upload Marks:**
Teachers can upload their marks online.
- **Attendance Tracking :**
Automated attendance tracking for students and teachers.
- **Admin Dashboard:**
Admin performs CRUD operations on students, courses, and teachers.
